Safety Precautions

1. The design of this product contains special hardware and many circuits and components specially for safety purposes. For continued protection, no changes should be made to the original design unless authorized in writing by the manufacturer. Replacement parts must be identical to those used in the original circuits. Services should be performed by qualified personnel only.
2. Alterations of the design or circuitry of the product should not be made. Any design alterations of the product should not be made. Any design alterations or additions will void the manufacturer's warranty and will further relieve the manufacture of responsibility for personal injury or property damage resulting therefrom.
3. Many electrical and mechanical parts in the products have special safety-related characteristics. These characteristics are often not evident from visual inspection nor can the protection afforded by them necessarily be obtained by using replacement components rated for higher voltage, wattage, etc. Replacement parts which have these special safety characteristics are identified in the Parts List of Service Manual. Electrical components having such features are identified by shading on the schematics and by (Δ) on the Parts List in the Service Manual. The use of a substitute replacement which does not have the same safety characteristics as the recommended replacement parts shown in the Parts List of Service Manual may create shock, fire, or other hazards.
4. The leads in the products are routed and dressed with ties, clamps, tubings, barriers and the like to be separated from live parts, high temperature parts, moving parts and/or sharp edges for the prevention of electric shock and fire hazard. When service is required, the original lead routing and dress should be observed, and it should be confirmed that they have been returned to normal, after re-assembling.
5. Leakage current check (Electrical shock hazard testing)
After re-assembling the product, always perform an isolation check on the exposed metal parts of the product (antenna terminals, knobs, metal cabinet, screw heads, headphone jack, control shafts, etc.) to be sure the product is safe to operate without danger of electrical shock.
Do not use a line isolation transformer during this check.

- Plug the AC line cord directly into the AC outlet. Using a "Leakage Current Tester", measure the leakage current from each exposed metal parts of the cabinet, particularly any exposed metal part having a return path to the chassis, to a known good earth ground. Any leakage current must not exceed 0.5mA AC (r.m.s.).

- Alternate check method
Plug the AC line cord directly into the AC outlet. Use an AC voltmeter having, 1,000 ohms per volt or more sensitivity in the following manner. Connect a 1,500 Ω 10 W resistor paralleled by a 0.15 μ F AC-type capacitor between an exposed metal part and a known good earth ground.

Measure the AC voltage across the resistor with the AC voltmeter.

Move the resistor connection to each exposed metal part, particularly any exposed metal part having a return path to the chassis, and measure the AC voltage across the resistor. Now, reverse the plug in the AC outlet and repeat each measurement. Any voltage measured must not exceed 0.75 V AC (r.m.s.). This corresponds to 0.5 mA AC (r.m.s.).

Warning

1. This equipment has been designed and manufactured to meet international safety standards.
2. It is the legal responsibility of the repairer to ensure that these safety standards are maintained.
3. Repairs must be made in accordance with the relevant safety standards.
4. It is essential that safety critical components are replaced by approved parts.
5. If mains voltage selector is provided, check setting for local voltage.

CONNECTION DIAGRAM

REAR PANEL

- ① TAPE 1, AUX, TUNER, CD and PHONO terminals
- ② TAPE 2/DAT terminals
- ③ GND terminal
If your turntable has a ground lead, connect it to the GND terminal.
- ④ SPEAKERS 1, 2 terminals
- ⑤ AC line voltage selector**
(LINE ↓ VOLTS ~)
Set the voltage selector so that the arrow points to the appropriate voltage.
- ⑥ SWITCHED AC OUTLETS**
- ⑦ UNSWITCHED AC OUTLETS**
** Not provided on units for Continental Europe, the United Kingdom and Australia.
- ⑧ Power cord

Notes:

- 1. Disconnect the power cord when connecting any component.
- 2. When connecting components, make the correct left and right channel connections. Reversed channels may degrade the stereo effect.
- 3. Connect speakers with correct polarity: (+) to (+) and (-) to (-). Reversed polarity will degrade the stereo effect.
- 4. Connect plugs or wires firmly. Poor contact may result in hum.
- 5. Do not connect equipment requiring more than the rated power to the AC outlets on the rear panel.
- 6. Use speakers with the correct impedance. The correct impedance is indicated on the rear panel of the AX-A341TN/AX-A342BK, AX-A441TN/AX-A442BK.
- 7. The SWITCHED AC OUTLETS are switched off when the front-panel POWER button is switched off.
- 8. The UNSWITCHED AC OUTLET is not switched off when the front-panel POWER button is switched off.
- 9. An MC or MM cartridge can be used for the turntable connected to the AX-A441TN/AX-A442BK.
- 10. Do not connect video signals to the terminal of this unit.

BEFORE USE

1. Installation

- Select a place which is level, dry and neither too hot nor too cold (between -5°C and 40°C/23°F and 104°F).
- Leave space between the rear of the amplifier and the wall. Good ventilation is needed, especially when the amplifier is driven at high output power. Also, leave space above the top of the amplifier for the same reason when stacking components.
- Do not allow a carpet, etc., to block the ventilation holes.
- Do not set it in a place subject to vibrations.

2. Power cord

- Check that the amplifier is set for your local supply voltage and frequency. If not consult the dealer from whom you bought it.
- When unplugging from the wall outlet, always pull the plug, not the power cord.
- Before plugging the power cord into an AC outlet, check to be sure the individual component are connected correctly.

3. Malfunctions, etc.

- There are no user servicable parts inside. If anything goes wrong, unplug the power cord and consult your dealer.
- Do not insert any metallic object inside the amplifier.
- Do not allow water to get inside the amplifier.
- Set the volume at minimum, before operation.

FRONT PANEL

1 POWER and indicator

Press this button to turn the power on.
 To turn the power off, press it again.
 The indicator lights when the POWER button is pressed to on.

2 PHONES (Headphones jack)

Plug stereo headphones into this jack for private listening.
 If you want to listen to sound from the headphone only, press the SPEAKERS button to "OFF".

3 SPEAKERS (☐ ON ☐ OFF)

Press to switch the speakers connected to the SPEAKERS 1 or 2 terminals on (☐) and off (☐).

4 BALANCE

Balances the volume between the left and right speakers. Usually set it to the center click position.

5 CD DIRECT and indicator

Press this button to enjoy listening to the CD with good sound quality. The indicator lights and the signal fed from the CD terminals is directly connected to the volume, bypassing the circuits on the way, thus allowing you to enjoy listening to an improved sound quality.

Please note:

- When CD DIRECT is on the amplifier gives priority to the CD player so that the CD sound is emitted from the speakers or headphones regardless of the source selected by the source selector.
- While the CD DIRECT button is pressed, spinning of the BALANCE knob does not change the reproduced sound.

6 CARTRIDGE (AX-A441TN/AX-A442BK only)

MC (☐): Press in when using an MC cartridge having an output of less than 0.5 mV.

MM (☐): Press again when using an MM or MC cartridge having an output of more than 0.5 mV.

7 LOUDNESS (☐ ON ☐ OFF)

Press this switch ON (☐) to compensate for the ear's different sensitivity to sound at low volumes.

8 BASS

Turn clockwise to boost bass response and counterclockwise to decrease it.

9 TREBLE

Turn clockwise to boost treble response and counterclockwise to decrease it.

10 MASTER VOLUME

Controls the volume of the speakers and headphones.

11 REC SELECTOR

TAPE 2/DAT ☐ 1: Set to this position to dub from TAPE 2 to TAPE 1 or to record DAT onto TAPE 1.

TAPE 1 ☐ 2/DAT: Set to this position to dub from TAPE 1 to TAPE 2 or to record TAPE 1 onto DAT.

PHONO: Set to this position to record PHONO.

CD: Set to this position to record CD.

TUNER: Set to this position to record TUNER.

AUX: Set to this position to record the source connected to the AUX terminals.

12 SOURCE SELECTOR

TAPE 2/DAT: Set to this position to listen to TAPE 2/DAT.

TAPE 1: Set to this position to listen to TAPE 1.

PHONO: Set to this position to listen to PHONO.

CD: Set to this position to listen to CD.

TUNER: Set to this position to listen to TUNER.

AUX: Set to this position to listen to the source connected to the AUX terminals.

Listening to Sources

1. Turn the POWER on and the indicator will light up.

2. Adjust the SOURCE SELECTOR to select the source.

3. Set the CARTRIDGE as required. (for PHONO only)

Note:

- Unless listening to PHONO, above operation is not necessary.

4. Select the speaker system with the SPEAKERS buttons.

5. Operate the corresponding equipment according to its instruction manual.

6. Adjust the MASTER VOLUME, BALANCE, TREBLE, BASS and LOUDNESS.

7. Use of S.E.A. Graphic Equalizer

By allowing you to independently boost or lower the response of finely divided sections of the frequency spectrum, the S.E.A. gives you much greater control over the sound quality of your stereo system. With an optionally available S.E.A. Graphic Equalizer, you can tailor the sound to your own taste for different types of music or to compensate for the particular acoustic characteristics of your audio components and listening room. The TAPE 2/terminals of the AX-A341TN/AX-A342BK or AX-A441TN/AX-A442BK can be used for connecting the S.E.A. Graphic Equalizer.

Note:

- To tailor the sound using SEA, select desired source by the REC SELECTOR and adjust the SOURCE SELECTOR position to TAPE 2/DAT connected to SEA.

TROUBLESHOOTING

What appears to be a malfunction may not always be serious.
Make sure first

No sound and no light

Is the AC plug connected properly?
Are the connections made correctly?
Are the inter-component connections correct?

No sound from speakers

Are speaker cords connected?
Are the SPEAKERS buttons correctly set?
Is the VOLUME control properly set?

Is your source component correctly set?

Sound from one speaker only

Are speaker cords connected correctly?
Is BALANCE control set to one extreme or the other?

Loud hum during record playing

Is turntable grounded?
Try to change cord path.
Insert the plugs by interchanging their positions.

Howling noise during record playing

Is turntable too close to a speaker?

SPECIFICATIONS

AX-A341TN/AX-A342BK OVERALL CHARACTERISTICS

Output power:

85 watts per channel into 4 ohms at 1 kHz (DIN).
65 watts per channel into 8 ohms at 1 kHz (DIN).
55 watts per channel, min. RMS, both channels driven, into 8 ohms from 20 Hz to 20 kHz, with no more than 0.007% total harmonic distortion.
55 watts per channel, min. RMS, both channels driven, into 8 ohms at 1 kHz with no more than 0.003% total harmonic distortion. (measured by JVC Audio Analyzer System)

Total harmonic distortion : 0.007% (20 Hz — 20 kHz, 8 ohms) at 55 watts
Intermodulation distortion : 0.007% (60 Hz : 7 kHz = 4 : 1, 8 ohms) at 55 watts
Power band width : 5 Hz — 50 kHz (IHF, 0.05%, 8 ohms both channels driven)
Frequency response : 5 Hz — 100 kHz +0, -3 dB (8 ohms)
Damping factor : 100 (1 kHz, 8 ohms)

Input terminals

Input sensitivity/impedance (1 kHz)

PHONO : 2.5 mV/47 kohms
CD/AUX/TUNER/TAPE 1, 2 : 200 mV/27 kohms

Signal-to-noise ratio

PHONO : 73 dB ('66 IHF)
CD/AUX/TUNER/TAPE 1, 2 : 110 dB ('66 IHF)
PHONO : 69 dB (DIN)
CD/AUX/TUNER/TAPE 1, 2 : 74 dB (DIN)

Tone controls

TREBLE: $\pm 8 \pm 1$ dB (at 10 kHz)
BASS: $\pm 8 \pm 1$ dB (at 100 Hz)

Loudness controls

(Volume control at -30 dB position)
+6 dB (at 100 Hz), +4 dB (at 10 kHz)

EQUALIZER

PHONO overload capacity

(PHONO to TAPE 2 REC) : 100 mV (0.02% THD)

PHONO RIAA deviation

: ± 0.3 dB (20 Hz — 20 kHz)

Recording output

Output level/impedance
TAPE 1, 2, REC : 200 mV/800 ohms

GENERAL

Dimensions : 435 (W) x 127 (H) x 306 (D) mm
(17-3/16" x 5" x 12-1/16")
Weight : 7.2 kg (15.9 lbs.)

Design and specifications subject to change without notice.

AX-A441TN/AX-A442BK OVERALL CHARACTERISTICS

Output power:

110 watts per channel into 4 ohms at 1 kHz (DIN).
75 watts per channel into 8 ohms at 1 kHz (DIN).
65 watts per channel, min. RMS, both channels driven, into 8 ohms from 20 Hz to 20 kHz, with no more than 0.007% total harmonic distortion.
65 watts per channel, min. RMS, both channels driven, into 8 ohms at 1 kHz with no more than 0.003% total harmonic distortion. (measured by JVC Audio Analyzer System)

Total harmonic distortion : 0.007% (20 Hz — 20 kHz, 8 ohms) at 65 watts
Intermodulation distortion : 0.007% (60 Hz : 7 kHz = 4 : 1, 8 ohms) at 65 watts
Power band width : 5 Hz — 50 kHz (IHF, 0.05%, 8 ohms both channels driven)
Frequency response : 5 Hz — 100 kHz +0, -3 dB (8 ohms)
Damping factor : 100 (1 kHz, 8 ohms)

Input terminals

Input sensitivity/impedance (1 kHz)

PHONO (MM) : 2.5 mV/47 kohms
PHONO (MC) : 200 μ V/100 ohms
CD/AUX/TUNER/TAPE 1, 2 : 200 mV/27 kohms

Signal-to-noise ratio

PHONO (MM) : 85 dB ('66 IHF)
PHONO (MC) : 67 dB ('66 IHF)
CD/AUX/TUNER/TAPE 1, 2 : 110 dB ('66 IHF)
PHONO (MM) : 69 dB (DIN)
CD/AUX/TUNER/TAPE 1, 2 : 74 dB (DIN)

Tone controls

TREBLE: $\pm 8 \pm 1$ dB (at 10 kHz)
BASS: $\pm 8 \pm 1$ dB (at 100 Hz)

Loudness controls

(Volume control at -30 dB position)
+6 dB (at 100 Hz) +4 dB (at 10 kHz)

EQUALIZER

PHONO overload capacity (PHONO to TAPE 2 REC)

PHONO (MM) : 100 mV (0.02% THD)
PHONO (MC) : 8 mV (0.04% THD)

PHONO RIAA deviation

PHONO (MM) : ± 0.3 dB (20 Hz — 20 kHz)
PHONO (MC) : ± 0.5 dB (20 Hz — 20 kHz)

Recording output

Output level/impedance
TAPE 1, 2, REC : 200 mV/800 ohms

GENERAL

Dimensions : 435 (W) x 127 (H) x 306 (D) mm
(17-3/16" x 5" x 12-1/16")
Weight : 7.5 kg (16.6 lbs.)

Design and specifications subject to change without notice.

Recording Tapes

1. Set the REC SELECTOR as desired.

2. Play the source according to its instruction manual.

3. Operate the tape deck for recording.

Notes:

- To listen to another source while recording, select desired source by the SOURCE SELECTOR.
- If your tape deck is 3-head type, you can monitor the sound being recorded. In this case, adjust the SOURCE SELECTOR position to TAPE 1 or TAPE 2/DAT connected to tape deck.

Tape Dubbing

Dubbing between TAPE 1 and TAPE 2 is carried out as follows:

— To record from TAPE 1 to TAPE 2 —

1. Set the REC SELECTOR to TAPE 1 > 2/DAT.

2. Play back the deck TAPE 1 and operate the deck TAPE 2 for recording.

Note:

- To monitor the recorded sound, connect 3 head-deck to TAPE 2/DAT terminal and set the source selector to TAPE 2.

— To record from TAPE 2 to TAPE 1 —

1. Set the REC SELECTOR to TAPE 2/DAT > 1.

2. Play back the deck TAPE 2 and operate the deck TAPE 1 for recording.

Note:

- To monitor the recorded sound, connect 3 head-deck to TAPE 1 terminal and set the source selector to TAPE 1.

Disassembly Procedures

(1) Removing the Top Cover

1. Remove the 4 screws fastening both sides of the Top Cover, and the 2 screws fastening the rear sides.
2. Remove the Top Cover.

(2) Removing the Bottom Cover

1. Remove the 18 screws (A). (Fig 2)
2. Remove the Bottom Cover.

(3) Removing the Front Panel

1. Remove the top cover.
2. Remove the 3 screws (B) and 3 plastic rivets (C). (Fig 1,2)
3. Pull out the main volume knob.

(4) Removing the Power Transistor

1. Remove the top cover and the bottom plate.
2. Unsolder the defective power transistor.
3. Remove the screw holding the power transistor using a pair of pliers, a wrench or a bent screwdriver

(5) Removing / Installing the flexible wire of remote switch

1. Set the SOURCE SELECTOR knob (REC SELECTOR knob) to AUX position when removing .
2. Insert the tip of the driver into the openings in the switch.(Fig 3)
3. Move the driver down so that the claws of the switch open.
4. After opening both claws , lift the mold portion.
Note : Be most careful when handling the flexible wire.
Do not bend it sharply or twist it .
5. Set the SOURCE SELECTOR knob (REC SELECTOR knob) to AUX position of switch to (D) (or (E)) direction , then install the mold portion .

Fig 1. Top View

Fig 2. Bottom Cover

Fig 3. Removing the flexible wire of remote switch.

Fig 4. Installing the flexible wire of remote switch.

Power Amplifier Adjustment Procedures

Idling Current

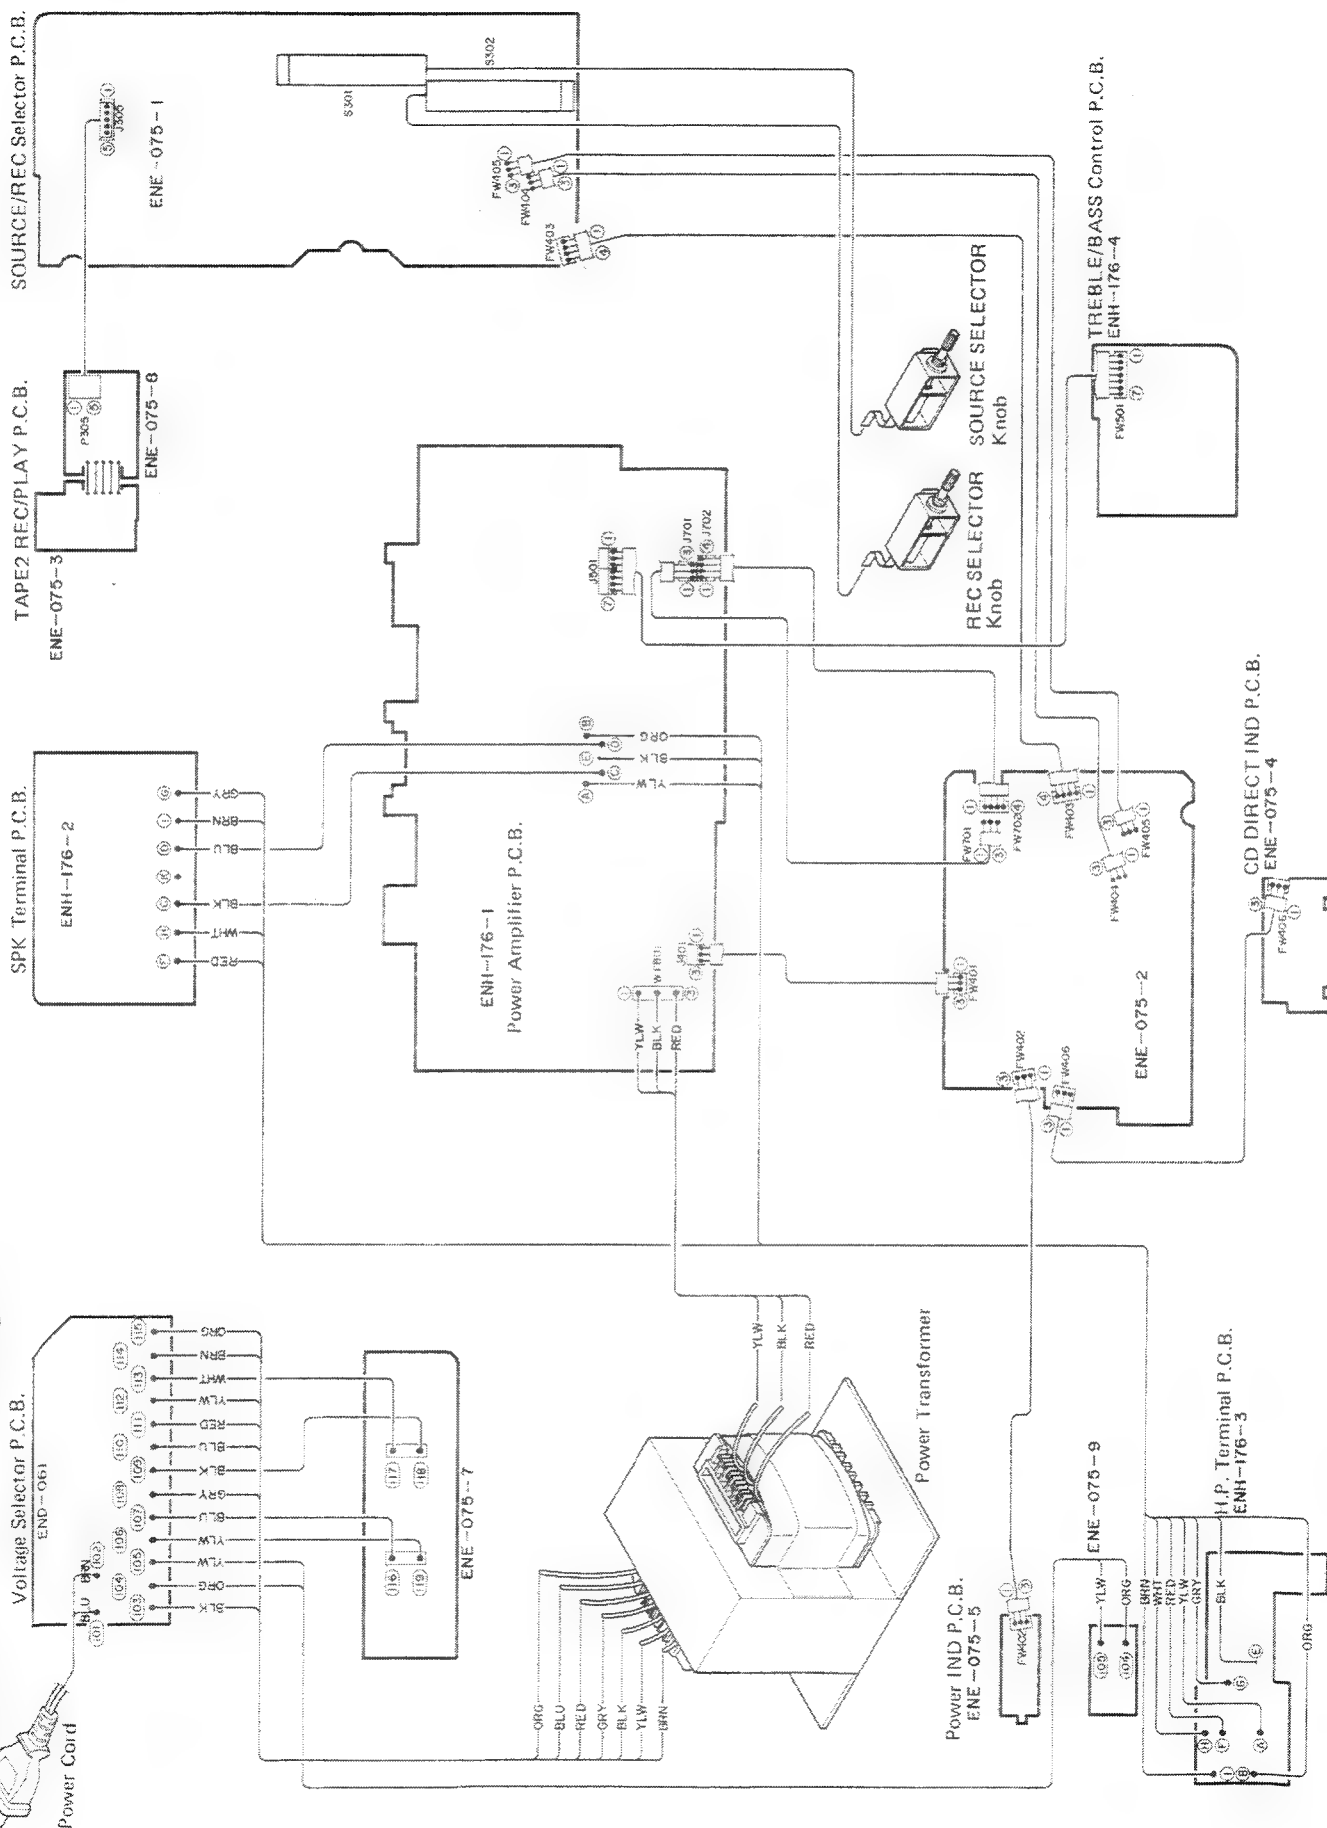

- (1) Set the volume control to minimum during this adjustment.
- (2) Turn R751 and R752 fully counterclockwise before the power switch on.
- (3) Always start from cold, and allow 10 minutes to warm up before adjustment. If the heatsink is already warm from previous use the correct adjustment can not be made.
- (5) Connect a DC voltmeter to R773 resistor's leads for left channel, or to R774 for right channel.
- (6) Adjust R751 for left channel, or R752 for right channel, so that the DC voltmeter becomes 7mV ~ 15mV
